

SLE TRAINING

KNOWLEDGE TEAMWORK SKILLS FOR SUSTAINABLE DEVELOPMENT

SLE TRAINING is a training programme for international professionals in development cooperation. We understand international cooperation as a global responsibility and therefore train experts from the "South and East – West and North".

As part of the Humboldt-Universität of Berlin, SLE TRAINING combines first-class scientific standards with experience-driven practical approaches. We do not only develop capacities, we also provide a network consisting of the growing number of our alumni worldwide.

SLE TRAINING pursues an intercultural and interdisciplinary approach. Bringing participants from various cultural backgrounds and with different professions together, we consider mutual learning a prerequisite for successful international cooperation.

TRAINING PHILOSOPHY

Since 2005, our renowned short-term training courses in Berlin provide high quality application-oriented and experience-based training. We provide you with individual support, integrate you into an international and interdisciplinary group of colleagues and alumni and connect you to relevant organizations.

"Learning by doing for impact" is the key element of our training philosophy. Case studies, presentations, discussions, exercises and role plays help to create an environment of peer-learning, where participants can bring in their own experience and put methods into practice.

"The SLE TRAINING course was very interesting for me, not only by its content, but also for the intercultural exchange among people from all over the world."

Book Sambo, Mozambique

We promote the interpersonal dimension of international cooperation: human interaction, team work, exchange of ideas, creation of an inspirational work atmosphere, active listening, mutual learning and collaboration beyond personal, professional and national/ cultural backgrounds.

We are looking forward to meeting you!

Since 2005 we have welcomed
more than 940 participants
from 122 different countries.

TARGET GROUP

Our participants come from all around the globe. They include staff from development agencies, national and international NGOs, national governments, university students and researchers, as well as professionals from the private sector. A good command of English is a prerequisite.

We now offer online trainings!

This way, you'll get the benefits of our renowned face-to-face trainings without the time and expenses involved in traveling to Berlin.

Our online trainings are not pre-recorded training videos, webinars for large audiences or self-paced e-learning courses. They are virtual live trainings delivered by our trainers in real-time, focusing on the interaction of a small group of remote participants.

Just like our face-to-face trainings, these virtual classrooms aim at tailoring the discussions and learning experiences to the training needs of the participants.
